

Erasmus+

Toast

It is an honor and a great pleasure for the international organization of Mobility Friends to be able to participate in the program series of the national conference organized in honor of the 50th anniversary of the Hungarian Association of Physical Education Teachers within the framework of the ERASMUS+ program.

The professional conference is greeted with great respect by the participants of the event. Respecting the approach of inclusion, Mobility Friends organizes and coordinates the open labor market practices, training and cultural programs of young people and young people with special educational needs, including Hungarian schools, in the international arena.

The main goal of the institution is to provide a cohesive, dynamic environment in the implementation of educational, cultural, social and recreational projects, which at the same time express the mission, values and goals of the association. All citizens can take part in projects organized by the institution at local, national and international level, thanks to the Tempus Public Foundation's ERASMUS+ project, its diverse network and network with other public and private organizations. The goal of Mobility Friends, as a host institution, is to give participants from other countries the opportunity to develop their professional orientation and gain experience in the world of work, thereby enriching their various competencies. Through mobility, partners are given the opportunity to expand their knowledge, which can lay the foundation for a successful professional career. Mobility Friends opens its doors wide to every new project where individuals and communities can realize their ideas and goals. Mobility Friends works closely with various local, national and foreign partners, including educational institutions, universities, municipalities, qualification centers, associations, NGOs, research centers, consulting firms, and more.

Mobility Friends is ready to work together on any project that contributes to building a generation that secures a better future through education and training that provides new opportunities for new entrants, especially young people and adults with fewer opportunities and special needs.

Thank you for welcoming you, thank you for the opportunity.

I greet the Hungarian Association of Special Educators on its 50th birthday.
