

# Erasmus+

The month of June welcomed me with open arms, as one of our old partners (Martin János Szakképző Iskola, Szakiskola és Készségfejlesztő Iskola) invited me to the 50th anniversary event of MAGYE in the framework of the ERASMUS+ project, with the possibility of holding training, introducing themselves - gaining experience.

The main topic of the professional programs and conference was education and the educational methodology of students about students with special needs. Mobility Friends contributed to this conference by sharing their experiences in Portugal. Our friends introduced our Organization, as well as all the services that are offered to all schools who do not yet know us, and explained how we adapted to the needs of each person, at work and in our free time!

We would like to emphasize that we contribute to a world with multiple possibilities, regardless of differences, and that there are no barriers at Mobility Friends that can separate students from each other, as we always do our best to make everyone feel at home.

Thank you very much for the opportunity.

These days in Hungary were wonderful, not only the professional training, the possibility of the 3-day conference and programs, but also the unforgettable cultural experiences that they gave us. The most popular are cities, the Hungarian Parliament, natural parks, from hot springs to gastronomy and wine tasting! We have been welcomed with love, and Hungary will remain in our memory forever.
